Now FDA cleared: AmeriWater's Heatsan integrated heat disinfection system for the loop and dialysis machines

DAYTON, OH January 13, 2015 – The FDA has cleared AmeriWater's (SUEZ ENVIRONNEMENT) Heatsan dialysis heat disinfection system, an innovative design that can disinfect two separate distribution loops while providing hot water to dialysis machines.

Energy savings with programmed operating cycles
The Heatsan system gives dialysis facilities the ability to adjust operation for each day of the week, heating intervals, holding times and disinfection temperatures. As a result, the Heatsan can save energy and staff time while providing up to 100 gallons of 185°F water for disinfection. Incorporating a PLC controller, the Heatsan is operated by a dual color touch screen displaying alarms, system status, tank level and disinfection temperatures plus a password-protected event log holding up to 12 months of data.

Designed for reliable, worry free operation
The Heatsan's construction is rugged yet space-efficient featuring a stainless steel skid and an insulated stainless steel storage tank with a sloping base for easy drainage. The tank is fitted with three phase heating elements, level transmitter and a temperature monitor. The isolation of the RO and bicarb mixing system is accomplished with three-way motorized ball valves. A stainless steel recirculation pump and stainless steel solenoid valves complete the innovative package.

Part of an eco-friendly suite of heat-disinfect designs
“The Heatsan rounds out our line of integrated heat-disinfect dialysis water treatment systems that includes the MediQA for small to large central systems and the Centurion for portable single-patient use at home or in a medical facility,” said AmeriWater CEO, Diane Dolan.

ABOUT AMERI WATER

AmeriWater is a premier provider of water treatment solutions for dialysis, healthcare and industrial applications. Established in 1995, AmeriWater is headquartered in Dayton, Ohio with regional distributors across the Western Hemisphere. In 2011, AmeriWater was acquired by Degremont.

DEGREMONT

A subsidiary of the SUEZ ENVIRONNEMENT group, Degremont has been the world water treatment specialist for more than 70 years. Operating in more than 70 countries with over 5,000 employees, Degremont generated revenues of €1,110 million in 2013.

PRESS RELEASE

SUEZ ENVIRONNEMENT

Natural resources are not infinite. Each day, SUEZ ENVIRONNEMENT (Paris: SEV, Brussels: SEVB) and its subsidiaries deal with the challenge of protecting resources by providing innovative solutions to industry and to millions of people. SUEZ ENVIRONNEMENT supplies drinking water to 92 million people, provides wastewater treatment services for 65 million people and collects the waste produced by 52 million people. SUEZ ENVIRONNEMENT has 79,550 employees and, with its presence on five continents, is a world leader exclusively dedicated to water and waste management services. SUEZ ENVIRONNEMENT generated total revenues of EUR 14.6 billion in 2013.
